PROFESSIONAL SUMMARY

Enterprise Platform Product Owner with 10 years of experience owning platform roadmaps, cloud migrations, and AI-enabled B2B SaaS products on AWS, Azure, and SAP BTP. Delivered a **25% increase in platform throughput** and a **30% reduction in operating expenditure** through automated governance and a modular, decoupled architecture. Turn Finance, Supply Chain, and IT requirements into prioritized user stories for 12+ person engineering squads. Driven by reducing platform complexity and building around measurable user value.

CORE COMPETENCIES

Product Management: Product Roadmapping, PRDs & User Stories, Backlog Prioritization (RICE, HEART), Agile/Scrum, Go-to-Market Strategy, Voice of Customer, Jobs-to-be-Done, Stakeholder Management

Platform & Cloud: Platform-as-a-Service (PaaS), Multi-Tenant SaaS, SAP BTP, RISE with SAP, AWS, Azure, Hybrid Cloud, Cloud Migration, CI/CD, REST APIs, Docker, Clean Core Architecture

AI, Data & Reliability: Generative AI, SAP Joule, Applied AI, Telemetry & Observability, SLO/SLA Governance, FinOps, Python, Power BI, Mixpanel, SAP Datasphere

Security & Compliance: Zero-Trust Security, Identity & Access Management (SAML, LDAP), SOC 2, CMMI Level 3, Data Protection

Product Tools: Jira, Jira Product Discovery, Confluence, Productboard, ClickUp, Figma, FigJam, Draw.io

PROFESSIONAL EXPERIENCE

Enterprise Platform Product Owner Apr 2023 – Present

Crave InfoTech | Pune, India (Remote, US/UK/EMEA accounts)

- Own the roadmap and delivery for the **Elanco GTS RISE with SAP migration**, coordinating a multi-region cutover that landed on schedule with **zero unplanned business disruption**.
- Led the end-to-end release of the **FCC SSAM2405** platform, cutting planned cutover downtime by **35%** and accelerating post-deployment user adoption.
- Synthesized Voice of Customer insights into PRDs and an MVP roadmap for **GenAI and SAP Joule** capabilities, delivered ahead of schedule for critical customer landscapes.
- Built a Python/VM automation framework that reclaimed **830+ man-hours per year**, letting the team absorb a **20% increase** in project load without added headcount.
- Ran RICE-prioritized sprint planning and backlog grooming in ClickUp for a **12+ person squad across 3 geographies**, accelerating feature time-to-market by **20%**.
- Designed observability and telemetry dashboards using Applied AI, moving support from reactive incident tickets to automated platform health monitoring.
- Applied Jobs-to-be-Done in discovery workshops for Alfanar, Parle, and Meijer, converting legacy bottlenecks into structured backlogs and deployment roadmaps; also led the Eli Lilly cloud proof of concept from inception to deployment and right-sized SpringWorks cloud subscriptions.
- Built a centralized repository for root-cause analysis and activity logs, removing person-dependency and supporting the engineering centre's **CMMI Level 3** certification.

Technical Product Lead – Cloud Infrastructure & PaaS Sep 2021 – Mar 2023

Apprisia Consulting LLP | Pune, India

- Designed secure PaaS frameworks on SAP BTP with low-latency hybrid connectivity between on-premises systems and AWS/Azure for global clients in the US and Australia.
- Defined the Minimum Viable Architecture for enterprise cloud-transition assessments, helping cross-functional squads hit modernization milestones while staying aligned to the product roadmap.
- Engineered automated deployment and infrastructure scripting pipelines that cut incident response times by **17%** and improved production reliability.
- Ran structured user interviews to feed feature requirements; set architecture review and security compliance baselines that removed single points of failure across client environments.

Platform Technical Product Manager – Telemetry & SRE Aug 2020 – Aug 2021
Lance Soft Engineering | Bengaluru, India

- Established telemetry pipelines and Service Level Objectives, sustaining **99.9% platform availability** across mission-critical enterprise environments.
- Directed the release of centralized admin portals (SAP Fiori, HANA Cockpit), cutting administrative task friction by **20%**.
- Implemented automated health checks and proactive alerting, reducing mean-time-to-detect infrastructure anomalies by **25%**.
- Governed authentication integrations (LDAP, SAML, IAM) to enforce zero-trust standards across multi-tenant infrastructure.

Operations & Supply Chain Associate Jan 2020 – Jul 2020
Vishal Mega Mart Limited | Gurugram, India

- Partnered with Finance, Sales, and Logistics to streamline order-to-procurement workflows, tracking on-time delivery metrics across the retail supply chain.
- Led landscape design and setup of the initial S/4HANA 1909 proof-of-concept environments.

Technical Support & Operations Analyst Jul 2016 – Dec 2019
Yes Fashions Pvt Ltd | Surat, India

- Owned the CRM platform, enabling customer engagement and data-driven trade decisions; moved from merchandising into technical IT support as the organization's primary SAP consultant.
- Led the data processing team monitoring hardware sizing and CPU performance so infrastructure kept pace with business growth.

PRODUCT PORTFOLIO (CRAVE INFOTECH)

AccessHub.AI – Identity & access governance platform | accesshub.ai | Product Operation Strategist, 2025

- Defined requirements to automate tracking, rotation, and revocation of non-human credentials (API keys, service accounts) under a zero-trust model.
- Specified a context-aware policy engine that restricts role collections by live attributes such as region, plant, or project.
- Owned the roadmap for out-of-the-box connectors to identity services, ITSM tools, and GRC frameworks; aligned access-logging with **SOC 2** and **CMMI Level 3** audit needs.

CoreAssess.AI – GenAI-powered Clean Core assessment platform | coreassess.ai | Product Management, 2024

- Specified LLM and SAP Joule capabilities that parse legacy custom code and auto-generate functional and technical documentation.
- Built the product logic that categorizes custom objects into keep, refactor, migrate side-by-side, or retire.
- Delivered a FinOps engine that generates BTP cost estimates and migration ROI models; took the product from early-stage to enterprise-grade SaaS under QMS standards.

EDUCATION & CERTIFICATIONS

Executive Program, Product Management & Applied AI – iHUB DivyaSampark, IIT Roorkee (in progress)

B.Tech, Textile Chemistry – The Technological Institute of Textile & Sciences, Bhiwani (2016)

Diploma, Handloom & Textile Technology – Indian Institute of Handloom Technology (2013)

SAP Certifications: Applying the RISE with SAP Methodology; Administrating SAP S/4HANA Cloud, Public Edition; Experiencing End-to-End SAP Build; Modernize BW with SAP Datasphere (hands-on training)
